

INTRODUCTION TO AUTISM

Presented by: Sara Watters

Ever wondered why the most noise sensitive pupils are the noisiest in your classroom?

How can you promote positive interaction, reduce anxiety and increase engagement?

Sara has more than 25 years of experience working in a variety of educational settings from Early Years to Key Stage 3. She has worked at The Milestone School since 2004, supporting pupils with a range of needs including Autism, PMLD, PD, SLD and CLDD.

Drawing from research and practical experience Sara has a strong background in supporting practitioners in both mainstream and SEND settings through outreach, inreach, talks and interactive sessions.

This Introduction to Autism session has been designed to give practitioners an insight into autism and how to enable pupils to reach their potential.

During the session you will:

- Investigate the difficulties faced by autistic learners
- Identify sensory processing differences in your learners
- Discover ways to adapt the environment and your practice

22 November 2021
4pm – 6.30pm
Virtual (via Zoom)
