

EARLY TALK BOOST (AGES 3-4)

Presented by: Mandy Walton

1.9 million children in the UK are currently struggling with talking and understanding words. That's 1 in 5 children in classrooms across the country. Talk Boost can significantly improve children's talking and understanding of words.

Early Talk Boost is a targeted programme aimed at 3-4 year old children who need help with talking and understanding words. Most importantly, the programme helps to boost their language skills to narrow the gap between them and their peers. The programme aims to accelerate children's progress in language and communication by an average of 5 months after 9 weeks. Children who are selected to take part in the programme will attend three sessions per week during circle/story time, each lasting 15-20 minutes delivered by an early years practitioner. The sessions include activities that cover the foundation skills in speech, language and communication that children need for learning and understanding new words, as well as having conversations.

Once you have booked your training session with us, you will need to purchase a resource pack costing £550. The programme packs include everything you need to run the interactive, evidence-based programmes for children with speech and language challenges, including an intervention manual containing detailed session plans and all the resources required.
