

TALK BOOST KS1 (AGES 4-7)

Presented by: Mandy Walton

1.9 million children in the UK are currently struggling with talking and understanding words. That's 1 in 5 children in classrooms across the country. Talk Boost can significantly improve children's talking and understanding of words.

Talk Boost KS1 is a targeted programme for 4-7 year old children that need help with talking and understanding words, including children in Reception classes. It provides a structured programme that boosts children's progress in language and communication by an average of 9 – 18 months after a ten week intervention. Children who are selected to take part in the programme will attend three sessions per week in small groups, each lasting 30-40 minutes delivered by the teaching assistant. Sessions include activities that cover the key elements of language: Attention and Listening, Vocabulary, Building Sentences, Telling Stories and Conversations. In addition, the teacher will run a weekly whole-class activity and there are activities that can be practiced at home.

Once you have booked your training session with us, you will need to purchase a resource pack costing £550. The programme packs include everything you need to run the interactive, evidence-based programmes for children with speech and language challenges, including an intervention manual containing detailed session plans and all the resources required.
